

CAMPAIGN GOALS

1

Build a 21st Century Interpretive Center.

It will provide a world-class, accessible, educational and inspirational experience. The new building will incorporate:

- Self-guided exhibits and galleries, featuring new technologies that will engage and inspire.
- Programming spaces with technology for livestreaming, recording, and projection.
- Secure, fire-safe, environmentally-controlled space for historic collections that meets museum standards.
- Classrooms, offices, and library space for scholars, interns, students, volunteers, and staff.
- Retail space and facilities to support catering and special events.
- Adequate parking and drop-off for cars and buses.

2

Raise a significant permanent fund to serve as a cornerstone of our financial sustainability.

This fund will generate a dependable stream of income for the ongoing restoration, monitoring, maintenance, and conservation of the Anthony Museum's historic property and assets.
